MEMORANDUM FOR: Director of Logistics

SUBJECT: Transportation for Female Employees required to work on night shifts

It has been brought to my attention that adequate transportation arrangements for female employees who are assigned to night shift duty is not being provided. I recognize that this is not a new problem, but I believe that a complete reconsideration is warranted in light of the relatively large number of such employees who are now working on night and midnight shifts I request therefore, that the problem be fully explored and that the requirements of all Agency elements having personnel in this category, be taken into account.
